Connecticut Business Analytics Summit CBAS 2021

Bias in Big Data

ABOUT

The Connecticut Business Analytics Summit (CBAS) is a one-day event for all data science and business analytics professionals – from large global companies to small, local startups. The summit brings together industry professionals, faculty experts, and analytics students to share experiences, explore best practices, discuss business trends, and identify emerging developments in the analytics space.

caba.uconn.edu

WHY ATTEND?

CBAS is Connecticut's first annual summit creating an interactive dialogue within Connecticut's business analytics space. Speakers share their knowledge and experiences navigating the complex field of analytics and managing the biases they encounter within their respective industries. The summit's networking opportunities provide a forum to build relationships and foster a dynamic community of analytics professionals.

WHO SHOULD ATTEND?

- **C-level executives** who develop the vision, objectives, and strategy of their organization
- **Board members** and **financial executives** who oversee the process
- **Senior executives** who are leading digital transformation
- **Business unit** and **functional managers** who are executing the digital transformation
- **Students** and **faculty** who are in the data science and analytics fields
- **Anyone interested in** analytics methods, applications and/or bias in big data
